

Quality Policy

We provide products and servicing that meet customer expectations and can use them with confidence.

To realize above quality policy, we will,

- ✓ Maintain effective quality policy management system at all times, establish processes that conform to customer, legal, and other requirements, including safety, and strive for continuous improvement of processes and product quality.
Ensure that the pressure resistance tests and so on are performed to minimize safety risks to customers.
- ✓ Set quality targets at the relevant internal departments in line with practical operations, develop activities to achieve the targets, and review them periodically.
- ✓ Make sure that each employee could be aware of and understands the these requirements through the department belonged and job position.
- ✓ Review and examine the policy itself at the annual management review.
